Stone Seed Farmerselect

0% Interest until Nov 25, 2019

Application Deadline: Mar 31, 2019

Minimum Purchase \$2,500

***America's Farmers Grow America*
Root for Rural
AmericasFarmers.com**

Grow Rural Education

-Farmers nominate their local public school districts to compete for a \$10,000 or \$25,000 grant to enhance STEM curriculum.-

Grow Ag Leaders

-Farmers endorse applicants for a \$1,500 scholarship to support their studies in an ag related fields after high school. AgLeader scholarships are administered by the National FFA Organization.-

Grow Communities

- Farmers are eligible for a chance at a \$2,500 donation to direct to a nonprofit of your choice. Since 2010 America's Grow Communities, sponsored by the Monsanto Fund, has awarded more than \$29 Million to over 8,000 organizations.-

Many FFA students across the country were able to attend National FFA Convention in Indianapolis October 24-27. Putnam County FFA was among that group that was also able to tour ADM Research Center in Decatur, tour a Monsanto Soybean Research/Packing Center in Indy, tour the National FFA Center and Lincoln Tech. They attended the National FFA Career Expo, and heard Sonny Perdue, our US Secretary of Ag, speak. Also out of 70,000 people at National FFA Convention, Putnam County FFA was a few of the 7,000 people to hear President Donald J. Trump speak. This is the first time a President has spoke at convention since 1991. The National FFA Theme this year was "Just One. One moment, one encounter, one opportunity is all it takes to radically change the course of our lives."

NemaStrike Technology

By piercing and infecting the roots of the plant, **nematodes** steal nutrients and water, and open the door for secondary issues. Nematodes can cause damage and yield loss by: feeding on plant roots; facilitating bacterial and fungal infections; and transmitting viruses.

With a novel mode of action and low water solubility, **NemaStrike Technology** defends crops from the start and stays in the root zone as plants grow — **for up to 75 days**. Plus, it has demonstrated consistent yield protection in hundreds of field trials, over 3 years of testing, in all soil types and levels of pressure.

Looking for more protection for your farm?>

FortiField SmartStax 5738RIB **FortiField Double Pros 5852RIB**

5858RIB 6298RIB 6468RIB **5852RIB 6292RIB 6462RIB**

Stone Seed FortiField corn products, featuring **enhanced agronomic characteristics plus improved disease protection!**

Using superior genetics through enhanced breeding technologies, **Stone Seed FortiField** products have been carefully developed and locally tested to provide high-performing agronomic advantages throughout the growing season from emergence through harvest. This includes **early-season emergence and seedling vigor; midseason root and stalk strength and late-season health (stay-green); and harvest intactness.** In addition, **Stone Seed FortiField** products defend against local diseases including **Gray Leaf Spot, Northern Corn Leaf Blight and Anthracnose Stalk Rot.**
